

“Service you deserve,

Expertise you need!”

Conduct business with confidence with Strategic Management and services.

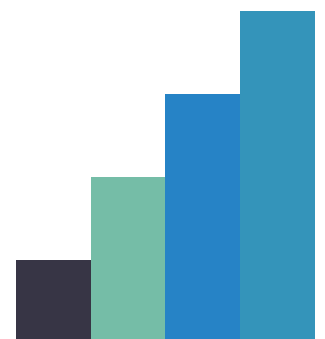

Who We are

AFIML is an organization with the mission to develop *strategic infrastructure* for effective banking systems in India and to take them to the next level by developing every aspect of business as strategy, technology, and funds together.

In our legacy of the organization, we have developed the strategic Infrastructure for Banking in India, with the most unique and innovative process, product, and technology to redefine the banking and economy generation modules together. Our R&D, Processes, technology teams are tremendously doing their jobs to impact industry, even though a lot of acknowledgements have been received on the same.

Objective & Innovations

To develop strategic infrastructure for effective banking systems in India and to take them to the next level by developing every aspect of business as strategy, technology, and funds together.

Xpert Resource

Xpert Resource Solution is an advanced training application that provides modern training capabilities to the organization that helps you provide training to new and experienced employees. Also, as per the requirement and the necessary training information can be updated or changed to improve the quality of the employees.

Benefits and features of Expert Resource

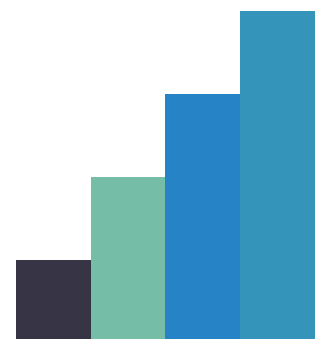

1. Support for Employee Life Cycle
2. Creating and distributing training materials
3. Increase the productivity of your employees
4. Feedback

1. Support for Employee Life Cycle

Xpert Resource includes it all: a master user can upload training and configuration documents, upload virtual or classroom training video links as needed, and create a portal for employee training through continuing support for online courses.

2. Creating and distributing training materials

The organization can create documents based on the training concept including written notes, training video links and upload question papers.

If employees need specific training or for underperforming employees, you can arrange training and counseling programs to improve their performance.

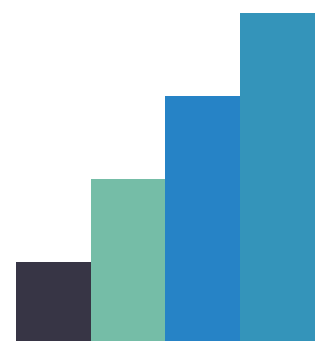

3. Increase the productivity of your employees

Training becomes more effective and less time-consuming, as per the requirement the employee can use/access the training material anytime to improve his efficiency and perform the work he is doing

4. Feedback

When employees join a training course, Organization may not know how well they understand the training and its objective and employees are more likely to report their Good feedback only after the training.

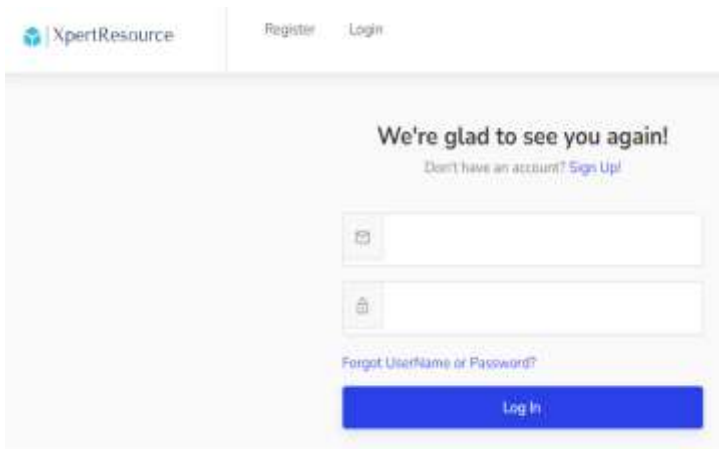

But here we can see the report of how well the employee has understood the training because after every training he has to take a test in that regard.
